

**AGENDA**  
**QUALITY, PATIENT CARE AND PATIENT EXPERIENCE COMMITTEE**  
**OF THE EL CAMINO HOSPITAL BOARD OF DIRECTORS**

**Monday, December 6, 2021 – 5:30pm**

El Camino Hospital | 2500 Grant Road, Mountain View, CA 94040

PURSUANT TO GOVERNMENT CODE SECTION 54953(e)(1), EL CAMINO HEALTH **WILL NOT BE PROVIDING A PHYSICAL LOCATION TO THE PUBLIC FOR THIS MEETING**. INSTEAD, THE PUBLIC IS INVITED TO JOIN THE OPEN SESSION MEETING VIA TELECONFERENCE AT:

**1-669-900-9128, MEETING CODE: 941 0003 6050#. No participant code. Just press #.**

**PURPOSE:** To advise and assist the El Camino Hospital (ECH) Board of Directors (“Board”) in constantly enhancing and enabling a culture of quality and safety at ECH, and to ensure delivery of effective, evidence-based care for all patients. The Quality Committee helps to assure that excellent patient care and exceptional patient experience are attained through monitoring organizational quality and safety measures, leadership development in quality and safety methods and assuring appropriate resource allocation to achieve this purpose.

**Melora Simon\*\***

**Members Absent**

**Krutica Sharma, MD**  
**Caroline Currie**

**\*\*via teleconference**

Agenda Item	Comments/Discussion	Approvals/ Action
<b>1. CALL TO ORDER/ ROLL CALL</b>	The open session meeting of the Quality, Patient Care and Patient Experience Committee of El Camino Hospital (the “Committee”) was called to order at 5:30pm by Chair, Julie Kliger. A verbal roll call was taken. Ms. Simone joined at 5:35pm and Dr. Marfatia joined at 5:38pm. Dr. Sharma and Ms. Currie were not present during roll call. All other members were present at roll call and participated in-person or telephonically. A quorum was present pursuant to State of California Executive Orders N-25-20 dated March 12, 2020 and N-29-20 dated March 18, 2020.	
<b>2. POTENTIAL CONFLICT OF INTEREST DISCLOSURES</b>	Chair Kliger asked if any Committee members had a conflict of interest with any of the items on the agenda. No conflicts were reported.	
<b>3. CONSENT CALENDAR</b>	<p><b>Motion:</b> To approve the consent calendar.</p> <p><b>Movant:</b> Kan  <b>Second:</b> Ting  <b>Ayes:</b> Kliger, Burn, Kan, Po, Somersille, Ting, Falwell  <b>Noes:</b> None  <b>Abstain:</b> None  <b>Absent:</b> Marfatia, Sharma, Currie, Simon  <b>Recused:</b> None</p> <p>Dr. Adams discussed a few items around the consent calendar:</p> <ul style="list-style-type: none"> <li>• Goal of C-Section of 2030</li> <li>• Discharging patients on multiple anti-psychotics</li> <li>• MRI/Stroke Time</li> </ul>	<p align="center"><i><b>Consent Calendar approved</b></i></p>
<b>4. CHAIR’S REPORT</b>	<p>Chair Kliger asked that George Ting, MD to report on her behalf since she was absent at the last meeting.</p> <p>George Ting shared the Board reviewed the Financial Report. Net Operating Income was good considering Covid. Due to the stock market, Net income had a banner year. These results were audited by an Auditing firm and they reported back that everything was excellent.</p>	

	<p>In closed session, the Board reviewed the Executive Compensation more and approved the recommendations by the Executive Compensation Committee. One new item included was to purchase the property at 2660 Grant Rd. Additionally, in the last Board meeting Dan Woods, CEO provided an update on the Strategic Planning Process.</p>	
<p><b>5. PATIENT STORY</b></p>	<p>Cheryl Reinking, CNO presented a Press Ganey survey regarding a patient who was admitted to the hospital after dinner when food service was no longer available. In these situations, pre-made sandwiches are available to be given to patients. This patient was given a sandwich with apple slices. Unfortunately, the patient is allergic to apples. She did not eat the apples but a double check regarding food allergies was missed and it is important to note this allergy was listed in her chart. Going forward, there will be a sticker on the plate reminding the nurse to check the food allergy before giving it to the patient. Also, because of her after dinner admission, she was given a generic meal for breakfast versus having the opportunity to choose what she would like. Going forward, an alert will go out to the nurses to remind them to get the patients preference when it's a night admission.</p>	
<p><b>6. FY 2022 QUARTERLY DASHBOARD REVIEW</b></p>	<p>Dr. Adams and Dr. Reinking presented the FY22 Quarterly Dashboard and addressed the following items:</p> <ul style="list-style-type: none"> <li>• Catheter Associated Urinary Tract Infection metric</li> <li>• Patient Throughput metric</li> <li>• Sepsis Mortality Index</li> </ul> <p>Chair Kliger asked to add in the summary or overview section how these initiatives have affected the quarterly results when the Dashboard is reviewed again. Dr. Adams acknowledged and confirmed that can be done.</p>	
<p><b>7. EL CAMINO HEALTH MEDICAL NETWORK QUARTERLY REPORT</b></p>	<p>Ute Burness and Vince Manoogian presented the El Camino Health Medical Network Quarterly Report and reviewed the following:</p> <ul style="list-style-type: none"> <li>• 8 Quality Metrics – Overview</li> <li>• Quality Composite Metric Performance – FY22 Q1</li> <li>• 2021 MIPS Performance YTD as of September 2021</li> </ul> <p>Dr. Somersille requested to have additional information with how each protocol in place improved the metrics and by how much for the next meeting.</p> <p>Chair Kliger followed up by agreeing with Dr. Somersille's request stating the Committee would like a better understanding for each action item, what are the outcomes of those action items.</p>	
<p><b>8. PUBLIC COMMUNICATIONS</b></p>	<p>There was no public communication.</p>	
<p><b>9. ADJOURN TO CLOSED SESSION</b></p>	<p><b>Motion:</b> To adjourn to closed session at <u>6:53pm</u>.</p> <p><b>Movant:</b> Kan <b>Second:</b> Ting <b>Ayes:</b> Kliger, Burn, Kan, Marfatia, Somersille, Ting, Falwell, Simon <b>Noes:</b> None</p>	<p><i>Adjourned to closed session at 6:53pm</i></p>

	<b>Abstain:</b> None <b>Absent:</b> Po, Sharma, Currie <b>Recused:</b> None	
<b>10. AGENDA ITEM 17: RECONVENE OPEN SESSION/REPORT OUT</b>	Open session was reconvened at 7:14 pm. Agenda items 11-57 were covered in the closed session. During the closed session, the Committee approved the consent calendar: Minutes of the Closed Session of the Quality Committee (10/04/2021), Quality Council Minutes (10/06/2021), and Medical Staff Credentialing and Privileges Report.	
<b>11. AGENDA ITEM 18: CLOSING WRAP UP</b>	Chair Kliger reminder the Committee that the next meeting is December 6 <sup>th</sup> and the Committee can attend in-person.	
<b>12. AGENDA ITEM 19: ADJOURNMENT</b>	<b>Motion:</b> To adjourn at 7:17pm <b>Movant:</b> Burn <b>Second:</b> Falwell <b>Ayes:</b> Kliger, Burn, Kan, Marfatia, Somersille, Ting, Falwell, Simon <b>Noes:</b> None <b>Abstain:</b> None <b>Absent:</b> Po, Sharma, Currie <b>Recused:</b> None	<i>Adjourned at 7:17pm</i>

Julie Kliger, MPA, BSN  
Chair, Quality Committee

Prepared by: Nicole Hartley, Executive Assistant II

**EL CAMINO HOSPITAL BOARD OF DIRECTORS  
COMMITTEE MEETING MEMO**

**To:** Quality Committee  
**From:** Stephanie Iljin, Supervisor Executive Administrative Services  
**Date:** December 06, 2021  
**Subject:** Report on Board Actions

**Purpose:** To keep the Committee informed regarding actions taken by the El Camino Hospital and El Camino Healthcare District Boards.

**Summary:**

1. **Situation:** It is essential to keep the Committees informed about Board activity to provide context for Committee work. The list below is not meant to be exhaustive; still, it includes agenda items the Board voted on that are most likely to be of interest to or pertinent to the work of El Camino Hospital's Board Advisory Committees.
2. **Authority:** This is being brought to the Committees at the request of the Board and the Committees.
3. **Background:** Since the last time we provided this report to the Quality Committee, the Hospital Board has met once and District Board has not met. In addition, since the Board has delegated specific authority to the Executive Compensation Committee, the Compliance and Audit Committee, and the Finance Committee, those approvals are also noted in this report.

<b>Board/Committee</b>	<b>Meeting Date</b>	<b>Actions (Approvals unless otherwise noted)</b>
<b>ECH Board</b>	November 10, 2021	<ul style="list-style-type: none"> <li>- Minutes of the Open &amp; Closed Session of the Hospital Board Meeting (10/13/2021)</li> <li>- Credentialing and Privileges Report</li> <li>- Continuation of Resolution 2021-10 of the Board of Directors Making Findings and Determinations</li> <li>- Policy Revisions</li> <li>- FY 21 Period 2 Financials</li> <li>- Medical Staff Report</li> </ul>
<b>ECHD Board</b>	- N/A	
<b>Executive Compensation Committee</b>	November 04, 2021	<ul style="list-style-type: none"> <li>- Minutes of the Open &amp; Closed Session of the ECC Meeting (9/28/2021)</li> <li>- Minutes of the Open &amp; Closed Session of the ECC Meeting (10/20/2021)</li> <li>- Recommend to Appoint Executive Compensation Committee Members</li> <li>- Executive Relocation Program</li> <li>- FY21 CEO Performance Review Process and FY22 Recommendations</li> <li>- Letter of Rebuttable Presumption of Reasonableness</li> <li>- Individual Executive Goals Update</li> </ul>

**EL CAMINO HOSPITAL  
COMMITTEE MEETING COVER MEMO**

**To:** Quality Committee of the Board  
**From:** Catherine Carson, MPA, BSN, CPHQ, Sr. Director Quality  
**Date:** December 06, 2021  
**Subject:** FY22 Enterprise Quality, Safety, and Experience Dashboard

**Summary:**

1. **Situation:** The Enterprise Quality, Safety, and Experience dashboard is used throughout the organization to illustrate, track, and communicate a key set of metrics to align the quality, safety, and experience improvement work. These key metrics are selected based on a careful review of the organizational incentive goals, strategic goals, and areas of concern based on standardized benchmarks. These are not the only metrics that are tracked but represent the highest priority for the organization.
  - A. Provide the Committee with a snapshot of the FY 2021 metrics monthly with trends over time and compared to the actual results from FY2020 and the FY 2021 goals.
  - B. Annotation is provided to explain each metric.
2. **Authority:** The Quality Committee of the Board is responsible for the quality and safety of care provided to ECH patients. This dashboard provides oversight on key quality metrics.
3. **Background:** At the beginning of each fiscal year, an assessment is completed to identify specific areas for quality/performance improvement. A subset of these areas are then prioritized and designated as leading indicators to be tracked universally throughout the organization so that all clinicians—physicians included—and support staff are aligned in the improvement activities. Measures that demonstrate sustained improvement are removed (but still tracked) and others added. These twelve (12) metrics were selected for monthly review by this Committee as they reflect the Hospital’s FY 2021 Quality, Efficiency and Service Goals.
4. **Assessment:**
  - A. Readmission Index @ 1.07 with 231 readmissions
  - B. 6 SSEs for September 2021: 4 events were categorized as SSE5 - medication event (1), incorrect treatment(1) , delay in treatment(2) and 2 events categorized as SSE4 – both related to HAIs
  - C. Precursor Medication Safety Events: 16 - Top 4 trends include – pump misprogramming(3), incorrect dose (3) and omitted dose (4)
  - D. Mortality Index decreased to 0.84 with 37 deaths
  - E. HCAHPS Likelihood to Recommend for inpatient units increased to 81.9
  - F. ED LTR improved to 73.9
  - G. ECH MD Likelihood to Recommend improved to 76.8
  - H. One Surgical Site Infections in MV
  - I. Sepsis mortality Index increased to 1.05
  - J. PC-01 w/1 exceptional case needing delivery to have a cancer treatment
  - K. PC-02, Cesarean Sections decreased across the enterprise
  - L. Patient Throughput minutes increased.
5. **Other Reviews:** None
6. **Outcomes:**

**Suggested Committee Discussion Questions:** None

Quality Committee Follow up Item Tracking Sheet (12/06/2021)

#	Follow Up Item	Date Identified	Owner(s)	Status	Date Complete
1	Bring "negative" (not only positive) patient stories for discussion	11/4/2019	CR	Noted in Pacing Plan 12/2/19 going forward	Ongoing
2	Add control limits to Annual PI Reports	11/4/2019	CC/MA	Will be added to future reports	Ongoing
3	Look deeper into the the sytem for non-nursing related issues for the patient stories	12/2/2019	CR	Open	Ongoing
4	Cover Memos - Make sure to state what the staff wants from the committee/how the committee can be helpful and provide discussion questions	12/2/2019	Executive Team	Open	Ongoing

**EL CAMINO HOSPITAL BOARD OF DIRECTORS  
COMMITTEE MEETING MEMO**

**To:** Quality Committee of the Board of Directors, El Camino Health  
**From:** Cheryl Reinking, DNP, RN, NEA-BC  
**Date:** December 6, 2021  
**Subject:** Patient Experience Feedback from Patient Letter

**Purpose:** To provide the Committee with written patient feedback that is received from a patient.

**Summary:**

1. **Situation:** In honor of the holiday season, a positive letter was included this month highlighting the many processes and staff that are involved in providing service to a patient scheduled for surgery.
2. **Authority:** To provide insight into one patient's experience who noticed every step of her preparation for a procedure and nearly everyone she came in contact with which led to a positive experience due staff listening, explaining, and demonstrating compassion.
3. **Background:** This patient was scheduled for surgery at El Camino Los Gatos and subsequently had a procedure there and outlined her experience in the letter.
4. **Assessment:** This feedback is very detailed and generous. This provides as a method to provide feedback directly to the staff who are contributing to positive patient experiences along the continuum of care. It promotes a sense of pride and meaning when staff hear what a difference their individual care made in the patient's experience.
5. **Other Reviews:** None
6. **Outcomes:** The leaders shared this card with each staff member involved and it was read at the enterprise huddle and shared with community relations in case there is a broader use of this patient's voice.
7. **List of Attachments:** See patient comments.

**Suggested Committee Discussion Questions:**

1. How do you share positive feedback with each staff member?
2. How do you share such positive feedback across the enterprise?

**November 8, 2021**

Meriam Signo  
Director of Nursing Services  
El Camino Hospital  
815 Pollard Road, Los Gatos, CA 95032

**Dear Meriam Signo:**

From the bottom of my heart, I give you my gratitude for having an exemplary nursing staff. Before I had my surgery, your staff called me to make certain that I make an appointment to have the PSR COVID test 3 days prior to surgery. The instructions were clear regarding exactly where I was supposed to go. The nurse made certain that I knew exactly how the test will be conducted and what I am to expect. She, also, gave me my pre-op kit and instructions. Next, she directed me to the main entrance to go to Patient Services. At Patient Services, the clerk was professional and clearly explained the forms I needed to sign. She even walked me to the Laboratory. Joseph was professional and walked me through the process of collecting bloodwork and urine test. I was also given clear instructions on where to park and where to go for outpatient surgery. The day before surgery, I received a call to walk me through the process of preparing for surgery.

The day of the surgery went very well. I especially highly commend Kari Nagamine for preparing me for surgery and asking all of the right questions and walking me through the process. The anesthesiologist also talked with me about my concerns (I had a prior surgery by a different doctor and hospital and had a bad experience.) The staff and doctors reassured me that things will go very well this time around. I woke up within an hour after surgery. The bedside nurses walked me through the process of recovering from surgery and made certain that my doctor's orders were followed through. From this team, I highly commend Joji Bacani for being thorough in going through the prior nurses' notes and making certain that I'm preparing for the night at the hospital. The next morning, I highly commend Manuel Amaya for his professionalism in carefully removing the IV, as I am fearful of needles.

Should I have any colleagues, family members or friends who need outpatient surgery, I will be certain to refer them to El Camino Health of Los Gatos. Thank you for all of your support. And, I wish you and your staff only the very best this holiday season. Take care.

**CONFIDENTIAL**  
**EL CAMINO HOSPITAL**  
**COMMITTEE MEETING COVER MEMO**

**To:** Quality Committee of the Board  
**From:** Catherine Carson, Sr. Director Quality  
**Date:** December 6, 2021  
**Subject:** Q1 FY2022, 30 day All Cause, Unplanned Readmission Dashboard

**Purpose:** To provide comparison observed over expected (O/E) data on the 7 diagnoses measured as part of the HRRP Readmission Penalty program. Readmissions Index all payor/all cause for FY 2017, FY 2018, FY 2019, FY 2020, FY2021 and through end of Q1 2022. HRRP penalizes hospitals up to 3% of their inpatient Medicare revenue based for having worse-than-expected readmissions rates of *any* of the 6 conditions listed. At risk are those diagnoses with O/E above 1.0.

**Summary:**

1. **Situation:** ECH Organizational goal: Readmission Index, and hospitals incur as penalty under ACA of up to 3% of DRG payments for Readmission rates that are above CMS calculated expected for 7 diagnosis and procedures. Readmission Teams are focusing on readmissions in each category. A penalty is assigned to the hospital if any of the 7 categories are above the Expected rate.
2. **Authority:** Quality Committee of the Board is responsible for oversight of quality & safety.
3. **Background:** Readmission rates provided the 7 diagnosis groups for FY2017, FY2018, FY2019, FY2020, FY2021 and Q1 FY2022
4. **Assessment:** This report for the 7 diagnosis groups the same readmission index at 0.93 as the overall Readmission Index for the ECH FY2021 Organizational goal. The current O/E for Q1 FY 22 of 1.03 for these 7 diagnosis groups also reflects the increase in the overall readmission index that we are seeing. The O/E ratio is greater than 1.0 for 4 of the 7 diagnoses: AMI, Heart Failure, Pneumonia, and Total Hip/Total Knee Arthroplasty.
5. **Other Reviews:**
6. **Outcomes:**

**List of Attachments:**

1. Q1 FY2022 30 day All Cause, Unplanned Readmission Dashboard

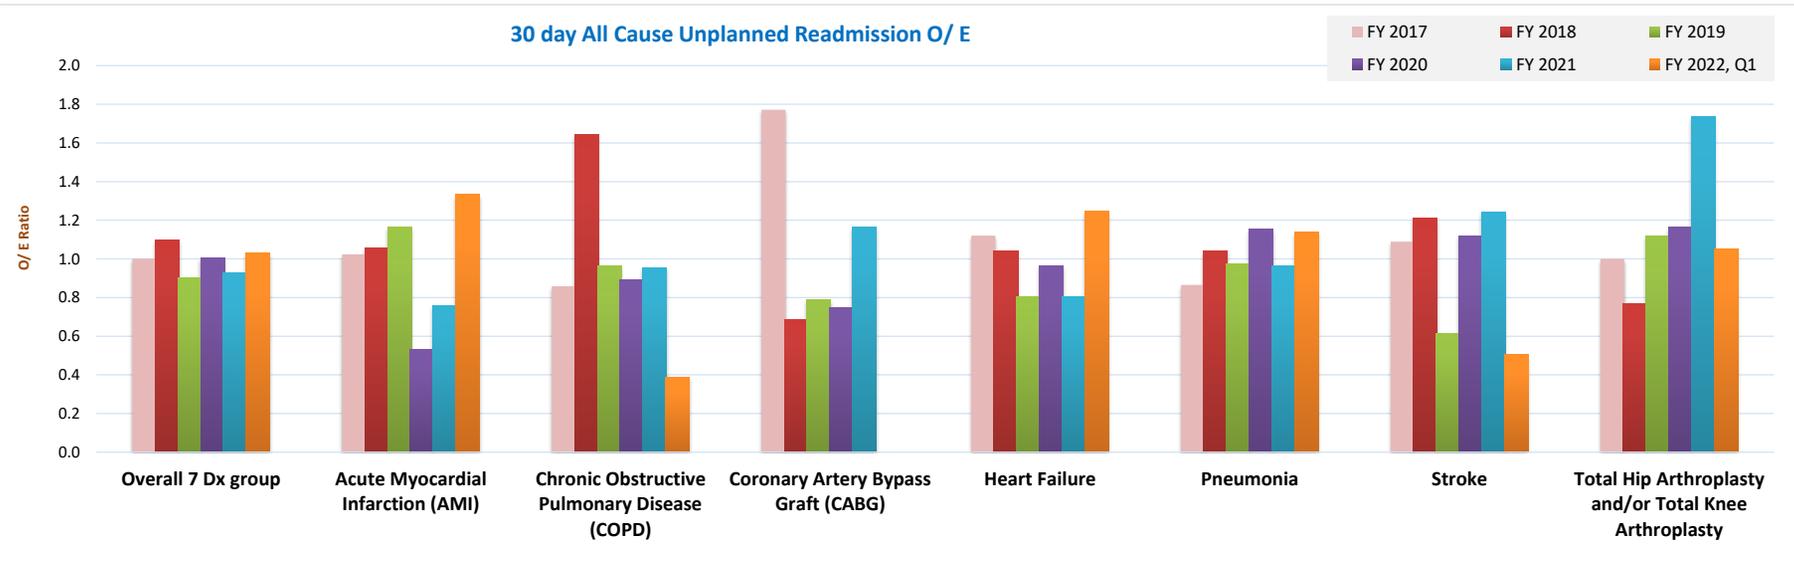

**Suggested Committee Discussion Questions:**

1. None

**CONFIDENTIAL**  
**EL CAMINO HOSPITAL**  
**COMMITTEE MEETING COVER MEMO**

**To:** Quality Committee of the Board  
**From:** Catherine Carson, Sr. Director Quality  
**Date:** December 6, 2021  
**Subject:** Patient Safety Indicator (PSI) Scores FY22 Q1 compared to Q1-Q4 FY21

**Purpose:** To provide an update on the AHRQ Patient Safety Indicators for Q1 FY22.

**Summary:**

1. **Situation:** The Patient Safety Indicators (PSIs) are a set of indicators providing information on potential in hospital complications and adverse events for all patients following surgeries, procedures, and childbirth. These events are amenable to changes in the health care system or provider. The PSIs were developed after a comprehensive literature review, analysis of ICD-10-CM codes, review by a clinician panel, implementation of risk adjustment, and empirical analyses.
2. **Authority:** Quality Committee of the Board is responsible for oversight of quality & safety.
3. **Background:** The PSIs can be used to help hospitals identify potential adverse events that might need further study; provide the opportunity to assess the incidence of adverse events and in- hospital complications using administrative data found in the typical discharge record; include indicators for complications occurring in hospital that may represent patient safety events; and, indicators also have area level analogs designed to detect patient safety events on a regional level.
4. **Assessment:** Each of the PSI are first reviewed and validated by the CDI manager and Coding manager, and are then sent through the Medical Staff's Peer review process for trending by physician. In this report PSI rates that are better than the Premier Mean are highlighted in green.
  - A. PSI-03 Pressure Ulcer – 1 in Q1; A COVID-19 pt. in MV-CCU developed penile corona from proning pressure
  - B. PSI-09 Perioperative hemorrhage or hematoma – 3 occurrences, reduced from 5 in the last report
  - C. PSI-10 Postoperative Acute Kidney Injury Requiring Dialysis – 1 occurrence.
  - D. PSI-17 Birth Trauma Injury to Neonate – 6 occurrences
  - E. PSI-18 and PSI-19 OB Vaginal trauma with & without instrument – both begin addressed by Maternal Child Health Medical Leadership with case review and education on documentation of injury
5. **Other Reviews:**

PSI-05	Retained Surgical Item or Unretrieved Device Fragment	0	0.07	0	0.07

Green=better than Premier comparative mean

**EL CAMINO HOSPITAL BOARD OF DIRECTORS  
COMMITTEE MEETING MEMO**

**To:** Board Quality Committee  
**From:** Mark Adams, MD, CMO  
**Date:** December 6, 2021  
**Subject:** Medical Staff Peer Review Process

**Purpose:**

Present the current medical staff approach to peer review

**Recommendation:**

No motion required

**Authority:**

Peer review is an essential function of the organized medical staff but oversight of this function is a Board responsibility.

**Situation:**

The Quality Committee requested an overview of the peer review process.

**Background:**

Professional physician peer review is an expected and required function of the organized medical staff (OMS). Traditionally, this was accomplished by specialty specific departments which often created inconsistent results as this was then limited to smaller groups of physicians often in competition with each other making objective determinations difficult and unreproducible. Based on recommendations from experts in this area such as The Greeley Company and Harty Springer Health Law, many organizations have moved to a more modern approach to peer review which is characterized by the term Multi-Specialty Peer Review. This involves the creation of an enterprise wide peer review process that is concentrated in a single body which is made up of dedicated, specifically trained physicians that are separate from departments, elected leaders, and medical politics. Peer review triggers are then developed to assure that all appropriate cases are reviewed. The El Camino Health medical staff engaged an outside consultant two years ago to assist in the development of a Multi-Specialty Peer Review process. The consultant helped the medical staff revise the bylaws to adopt this approach. Bylaw changes were then made at that time and these were approved by the medical staff at large prior to the onset of the pandemic.

**Assessment:**

“**Peer Review**” refers to the good faith activities utilized by the organized **medical staff** to conduct patient care **review** for the purpose of analyzing and evaluation the quality and appropriateness of care provided to patients. The basic underlying principles include:

- a. Fairness
- b. Credibility
- c. Consistency

Report on Medical Staff Peer Review Process  
December 6, 2021

d. Efficiency

The transition to this Multi-Specialty Peer Review approach has proceeded better than expected with the newly formed committee working at a very high level as confirmed by the recent internal audit presented to the Board Compliance Committee.

**List of Attachments:**

1. Power Point explaining peer review
2. Diagram of peer review work flow

# El Camino Health

## Peer Review

*Quality Committee*

*Dr. Mark Adams, CMO*

*December 6, 2021*

# Peer Review Agenda

- What is Peer Review?
- How has the Peer Review process changed?
- What are the underlying principles?
- What factors must be considered?
- How is the El Camino medical staff performing in this new approach?

## What is Peer Review

“**Peer Review**” refers to the good faith activities utilized by the organized **medical staff** to conduct patient care **review** for the purpose of analyzing and evaluation the quality and appropriateness of care provided to patients.

This is one of the most essential functions of the organized medical staff

# What is Peer Review?

## It may depend on the perspective!

- Physician- a method of delivering me my performance information evaluated by my peers so that I may improve my clinical care- Excellence standard
- Medical Staff leadership- a method of delivering performance information so that I may evaluate individual performance for acceptability- Competence standard

# What has Changed?

- Historically, physician peer review systems were
  - Dependent on case review
  - Conducted by specialty
  - Inconsistent and inherently biased
- Contemporary peer review models are
  - Moving from a dependence on case review to utilization of aggregate data
  - Conducted in forums with multi-specialty participation

# Basic Underlying Principles

- Fairness
- Credibility
- Consistency
- Efficiency

# Fairness

- Limit bias (individual or group) to the extent possible
- Conflict of interest- Absolute vs. Relative
- Decide measurement factors proactively
- Maintain process transparency

# Credibility

- Its all about the data
  - Attribution
  - My patients are sicker
  - The p isn't less than 0.05
- The enemy of good should not be perfect
- Data sources should be as good as possible

# Consistency

- Inter-rater reliability
  - Case review
  - Aggregate data
- Collect equivalent data for equivalent practitioners

# Efficiency

- Make best use of physician time as possible
  - Focused reviews
  - Committee time has bias towards action
  - Separate rating/evaluation function from action responsibility
- Support staff has marked limitations as well- make good use of limited resources
- Automate to the extent possible

# Peer Review System Design Factors

- Must apply the Basic Underlying Principles
  - Define who is a peer
  - Define what performance data is to be collected- Indicators
  - Define how that data is transformed into useful information
  - Define the process of performance reporting and management
  - Define a viable peer review structure
  - Define a viable case review process

# What makes up a good Case Review Process?

1. Case Gathering
2. Case Screening
3. Initial Review
4. Initial Committee Discussion
5. Involved Practitioner Input
6. Final Committee Decision
7. Communication of Decision
8. Improvement plan

# Multispecialty Peer Review

- The medical staff has moved from the old school system to this new approach
- While some specialties may continue to perform baseline peer review, all final adjudication of peer review findings are now the responsibility of this enterprise Practitioner Excellence Committee

# Multispecialty Peer Review

- Indicators that trigger peer review have been identified
- Committee membership is based on expertise and commitment
- Trending and tracking are emphasized over incident reporting to reduce bias

# Multispecialty Peer Review

Possible determinations by the committee:

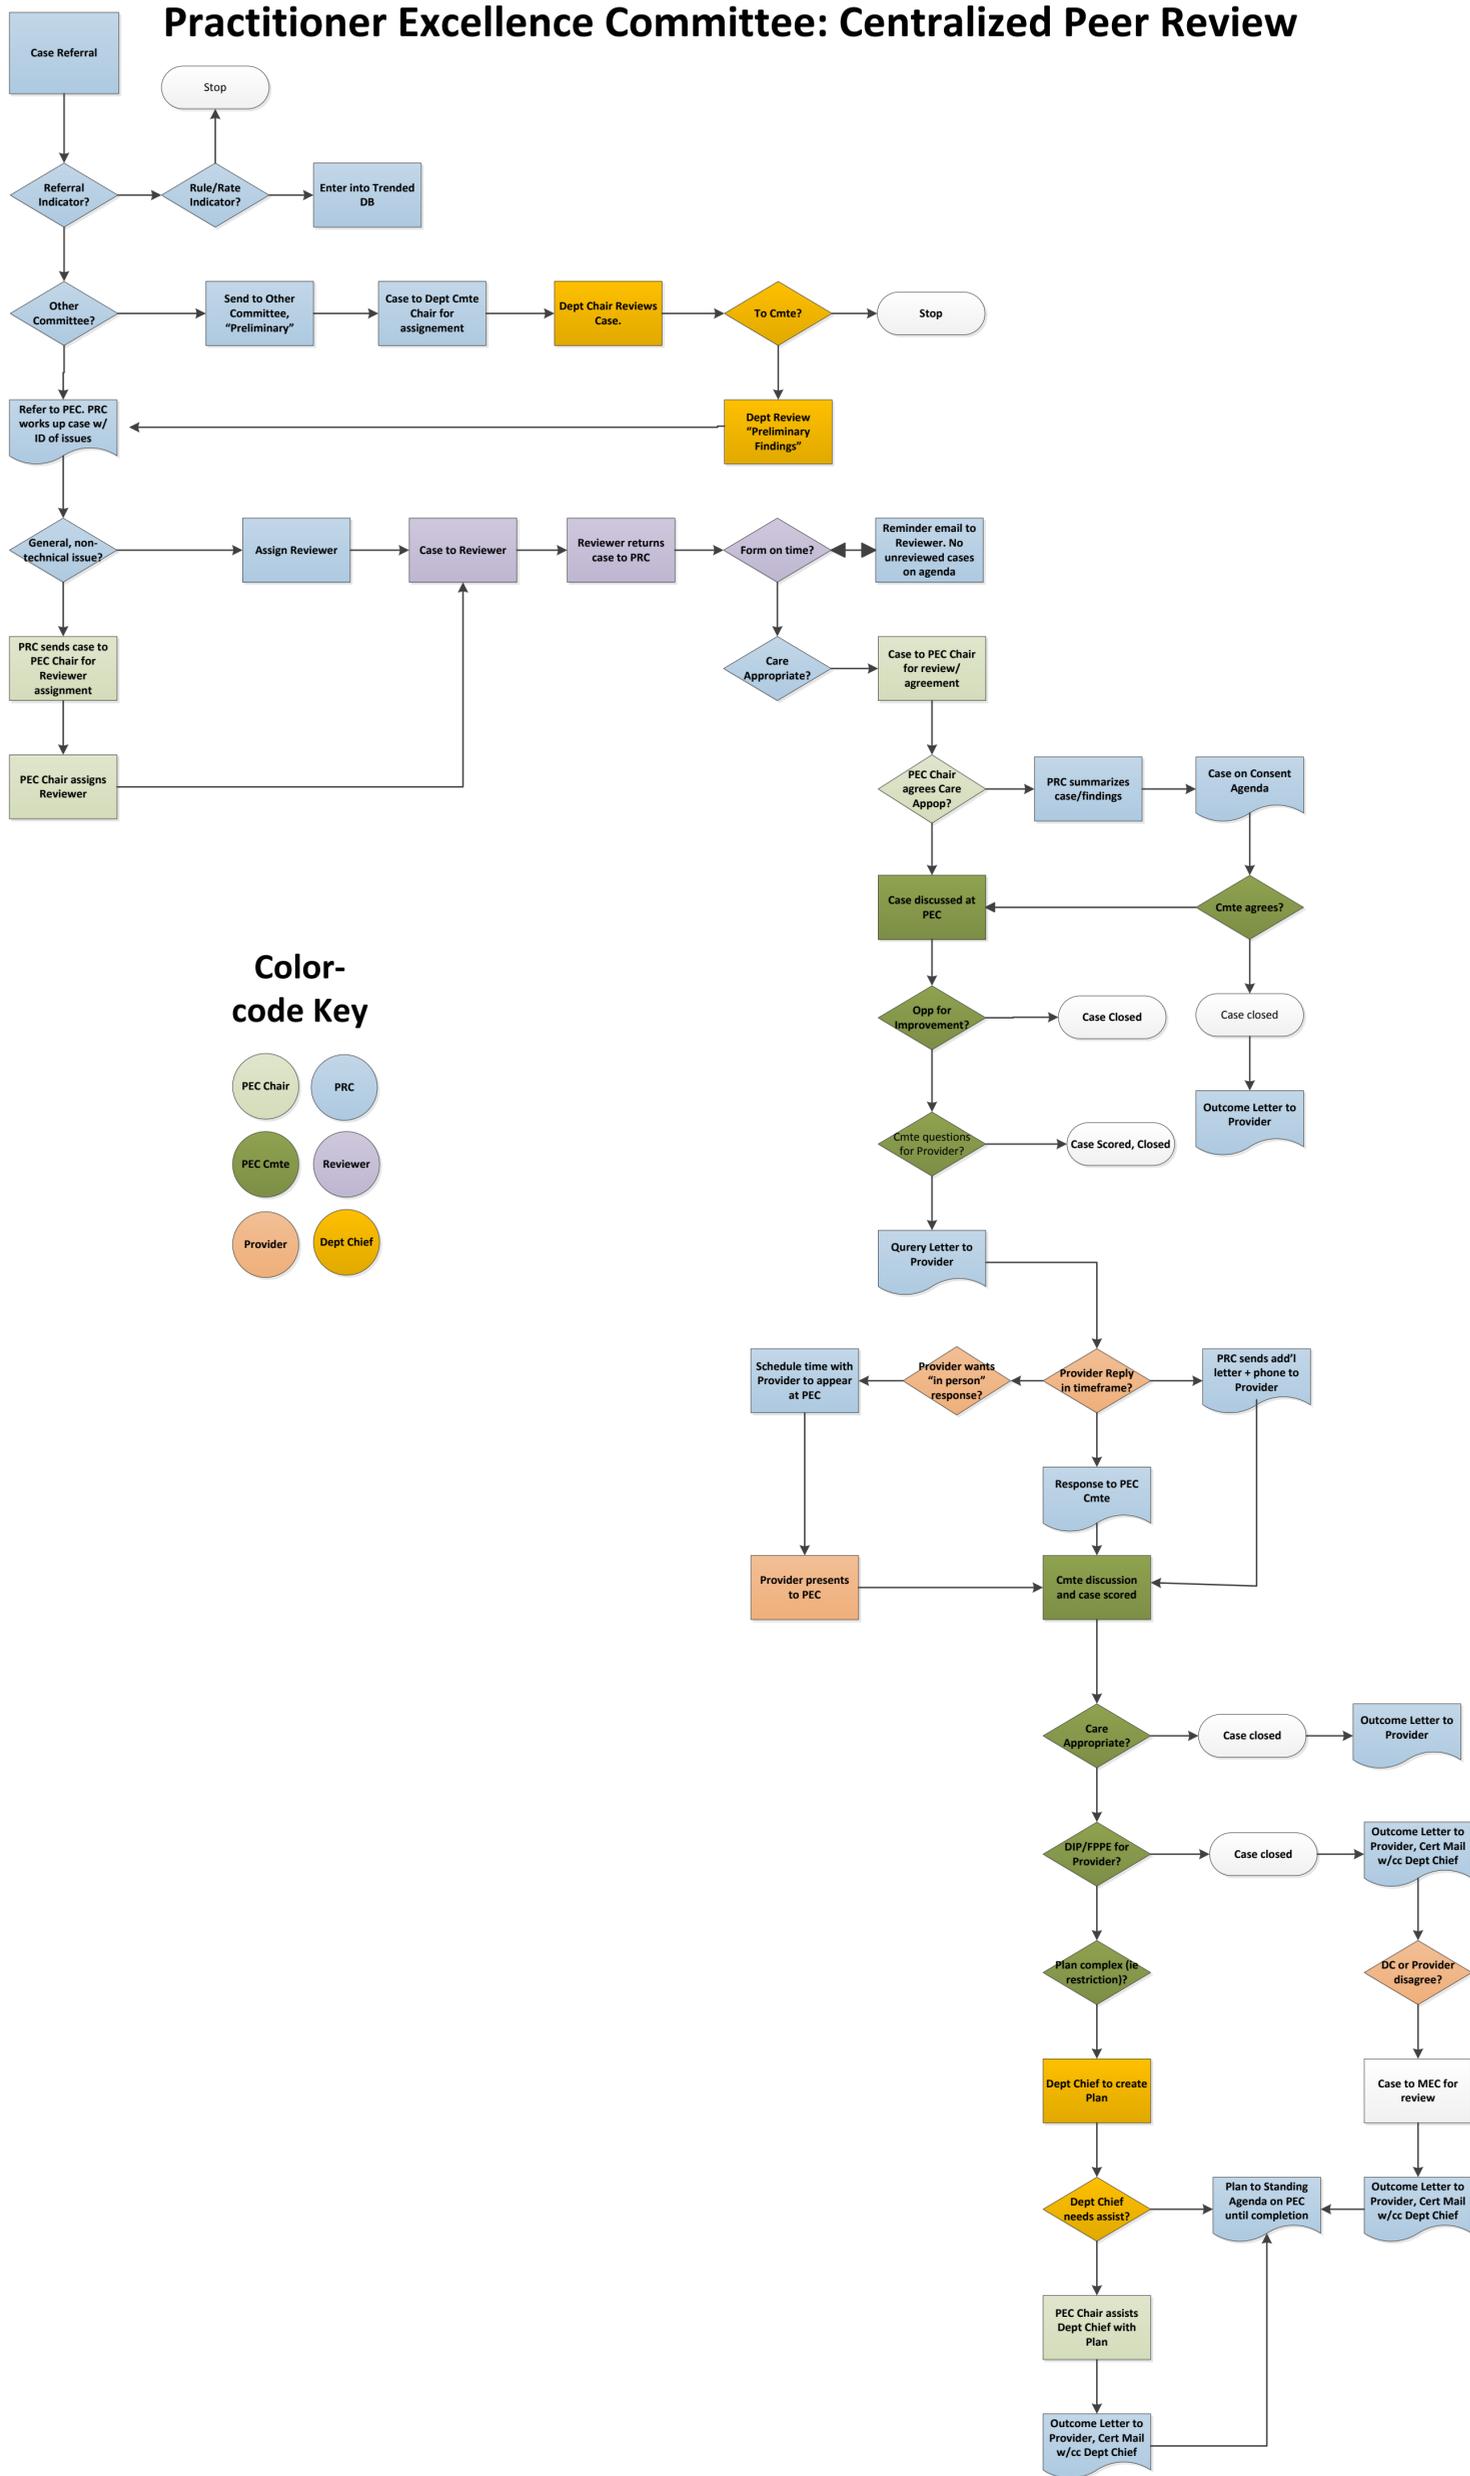

- Care meets standards
- Opportunity for Improvement Minor
- Opportunity for Improvement Major
- Exceptional Care
- System Issue identified

## Recent Internal Audit Results

- The peer review process and documentation met the regulatory compliance for periodic evaluations of members. To meet survey expectations a new *Case Rating Form* was developed and used across all departments to evaluate practitioners for the peer review. The case rating form evaluated practitioners across same criteria/standards and provided consistency in the evaluation.

# Practitioner Excellence Committee: Centralized Peer Review

## Color-code Key

**EL CAMINO HOSPITAL BOARD OF DIRECTORS  
COMMITTEE MEETING MEMO**

**To:** Board Quality Committee  
**From:** Mark Adams, MD, CMO  
**Date:** December 6, 2021  
**Subject:** Sepsis Mortality Index

**Purpose:** Review the current state of sepsis care at El Camino Health and performance improvement initiatives to reduce the Sepsis Mortality Index

**Recommendation:** No motion required

**Authority:** The Board Quality Committee is responsible for oversight of quality status and quality improvement activities.

**Situation:** The Sepsis Mortality Index has increased over the past fiscal year which is a nationally recognized shift even among the very top health system performers. The FY22 Sepsis Mortality Index target has been adjusted accordingly.

**Background:** Sepsis continues to be a significant driver of overall mortality. While mortality rates are over 40% for patients admitted to a hospital with septic shock, for patients identified earlier mortality rates decrease to 17% based on national data. (El Camino Health mortality rate for all sepsis patients is currently 10.88% which is considered quite low) A deep dive analysis of El Camino Health sepsis experience is included in the attachments below.

**Assessment:** Based on FY21 data analysis and clinician feedback here is a summary of the findings for current state:

- Overall higher sepsis bundle compliance in the survival group, particularly interventions shown to benefit outcomes (time to antimicrobial therapy, fluid resuscitation and prevention of progression to shock).
- Prolonged hypotension has been a common theme in many case reviews, timeliness to vasopressor initiation was lacking.
- Higher percentage of DNR (60% of mortality cases) on admission and advanced age & co-morbid conditions (oncology patients).
- Patients are presenting to the ED in late state of sepsis/disease process. Community fears around coming to the hospital in the midst of pandemic have decreased the opportunities to benefit from early intervention.
- Learning curve for treating severe COVID: lower use of antibiotics, also clinicians hesitant to fluid resuscitate patients with COVID and shock due to high potential to progress to ARDS. More research is forthcoming on how sepsis bundle should be modified for this population.
- Less family presence during pandemic visitor restrictions have decreased opportunities to have end of life discussions and/or transitions to hospice.
- Significant decrease in GIP (general inpatient hospice) care transitions.

The FY22 sepsis mortality index improvement plan has two major components which are improve clinical care and improve conversion of terminal sepsis cases to GIP:

### **Improve Clinical Care**

- Increase 3 hr. bundle compliance – especially ABX within 1 hr., Fluid bolus, and MAP compliance
  - Encourage provider attendance at 12/14 Townsend CME re: ECH reluctance re: fluid resuscitation
- Increase overall SEP-1 bundle compliance – 3hr + 6hr bundle
  - Provide provider level data on bundle compliance by specialty and for OPPE
- Improve Order set usage
  - Data on order set use by provider to Medicine Exec. Meeting
  - Revised data for ED with new sepsis alert process and workflow
- Reduce wait time to transfer into CCU – from the ED and from the Floor
  - More rapid acceptance of sepsis patients by intensivists
- Reduce hours of hypotension – improve more rapid use of vasopressors
  - Vasopressors can be initiated with peripheral line

### **Improve Conversion of Terminal Sepsis cases to GIP**

- Sepsis Navigator position to focus on improved communication w/patient, family & palliative care
- Encourage providers to document existing diagnosis on patient problem list so these diagnosis can be coded in this encounter even if not treated (history of cancer though admission is for sepsis)
- Provide education to Palliative care team regarding 6 month survivability of sepsis patients post hospitalization
- Encourage Palliative care team to approach all sepsis patients and family members who have DNR orders for conversations on end of life plans

Finally, the Sepsis Mortality Index target was adjusted to better reflect the reality of our own experience and that of the top performers across the United States. This adjustment follows the SMART approach to goal setting: Specific, Measurable, **Achievable**, Relevant, and Time-Bound.

SEP-1 Monthly Compliance

# Historical Perspective

Sepsis Mortality Trend: FY17 - FY22 end of September

FY	O/E
*FY17	1.19
FY18	1.40
FY19	1.27
FY20	1.00
FY21	1.08
FYTD 22 end of September	1.06

\*FY17 data includes October 2016 - June 2017

# Survival to Discharge Group

(refer to definitions in chart)

Key to Sepsis Survival is improved compliance with the sepsis bundle elements:

Note *higher* rate of:

- Early antimicrobial therapy
- Fluid bolus
- Achieved perfusion target (MAP)
- Overall bundle compliance

### Order Set by type September 2021

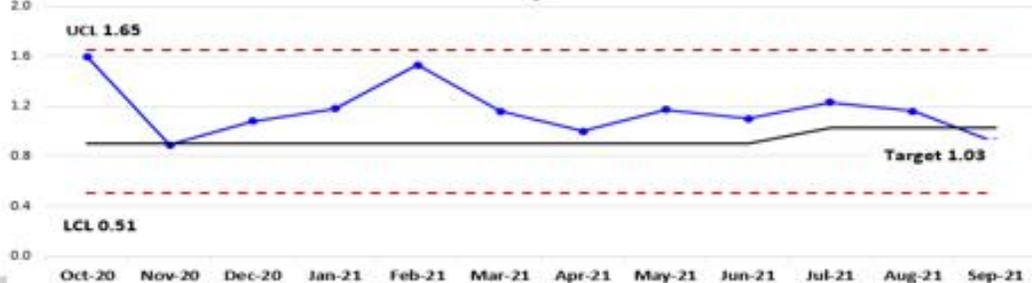

### SEP-1 Monthly Compliance

### Sepsis Mortality Index

Last 24 months of available data

## DRAFT FY22 Sepsis Mortality Goal

**Objective:**

To achieve Sepsis Mortality Index target of 1.03 by June 30, 2022

**Goals:**

- Improve Sepsis Survivability of patients through improved Sepsis Bundle Compliance  
Early Identification and appropriate management in the initial hours after the development of sepsis improve outcomes (Surviving Sepsis Campaign: International Guidelines for Management of Sepsis and Septic Shock 2021)  
Compliance with SEP-1 was associated with lower 3-day mortality. Rendering SEP-1 compliant care may reduce the incidence of avoidable deaths (Townsend, et al, j.chest. 2021.072167)
- Improve Sepsis Mortality Index by removing Sepsis deaths that can be transferred into GIP .  
If a sepsis patient is terminal, transferring the patient into GIP will eliminate the death in the acute care hospital and reduce the sepsis mortality index.

Key Performance Indicators & Targets	
KPI	Target FY22
What will we measure/track monthly to show progress towards goals?	
See the monthly Sepsis dashboard for these metrics.	

**Strategies**

❖ **Improve Clinical Care**

- Increase 3 hr. bundle compliance – especially ABX within 1 hr, Fluid bolus, and MAP compliance
- Encourage provider attendance at 12/14 Townsend CME re: ECH reluctance re: fluid resuscitation
- Increase overall SEP-1 bundle compliance – 3hr + 6hr bundle
- Provide provider level data on bundle compliance by specialty and for OPPE
- Improve Order set usage
- Data on order set use by provider to Medicine Exec. Meeting
- Revised data for ED with new sepsis alert process and workflow
- Reduce wait time to transfer into CCU – from the ED and from the Floor
- More rapid acceptance of sepsis patients by intensivists
- Reduce hours of hypotension – improve more rapid use of vasopressors
- Vasopressors can be initiated with peripheral line

❖ **Improve Conversion of Terminal Sepsis cases to GIP**

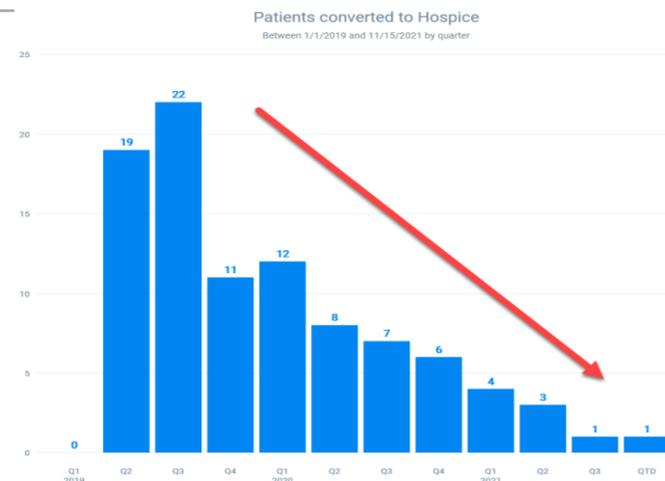

- Sepsis Navigator position to focus on improved communication w/patient, family & palliative care
- Encourage providers to document existing diagnosis on patient problem list so these diagnosis can be coded in this encounter even if not treated (history of cancer though admission is for sepsis)
- Provide education to Palliative care team regarding 6 month survivability of sepsis patients post hospitalization
- Encourage Palliative care team to approach all sepsis patients and family members who have DNR orders for conversations on end of life plans
